HIMACS: Perfect for kitchens and bathrooms

Solid Surface Material

Nowhere does quality count more than in the kitchen

Fine culinary artistry is celebrated in the kitchen. The demands are often exacting when it comes to handling high-quality foods and top kitchen equipment. The requirements in terms of functionality, durability, robustness, as well as aesthetics and comfort, simply couldn't be more demanding: right here in the heart of the home.

Whether as a sturdy worktop, flushmounted sink, wall cladding or cooking island: HIMACS transforms every kitchen into a dream.

What's the perfect material for bathrooms?

A sense of wellness and tranquility is essential in the bathroom. The ideal material to help achieve this should be pleasant to the touch, extremely hygienic and, naturally, waterproof. But once these practical considerations have been addressed, it also needs to be malleable and flexible enough to meet any design vision: from simple straight lines, to dramatic and opulent visions. HIMACS is the perfect material to meet all these conditions!

HIMACS offers the ideal surface solution for the bathroom. A comprehensive product range: wash basins that can be integrated seamlessly within the surface, contemporary top-mounted washbasins, shower trays and baths.

HIMACS inspires in the kitchen

HIMACS is safe and durable

- HIMACS is entirely free of silica, formaldehyde, nanoparticles and VOCs, helping to ensure the highest standards of indoor air quality for a healthier home environment.
- HIMACS is certified safe for food contact.
- HIMACS is easily repairable, allowing worktops to retain their premium finish for years, making them a durable and sustainable investment.
- A selection of our most popular colours, together with all HIMACS sinks and basins, feature SCS-certified recycled content, making this premium surface a smart and responsible choice.

HIMACS is hardwearing and resistant

- HIMACS is non-porous and 100% water-resistant.
- HIMACS is resistant to almost all common household chemicals and everyday stains such as fruit acid or red wine.
- HIMACS is heat-resistant thanks to its Thermalcure technology.

HIMACS is very easy to clean

- HIMACS can be cleaned using a damp cloth and standard household detergent, removing almost all dirt without leaving any residue.
- HIMACS can be fabricated with inconspicuous seams, preventing the accumulation of germs, bacteria and other pathogens.
- HIMACS offers a wide range of sinks and basins that can be seamlessly integrated into the worktop.

HIMACS looks fantastic

- HIMACS has a natural matt satin finish that can also be polished to a high-gloss finish on request.
- HIMACS offers a broad selection of attractive colours, from timeless solid shades to contemporary trend colours, as well as numerous natural stone-inspired designs.
- HIMACS can be fabricated like hardwood or thermoformed into three-dimensional shapes, while also enabling spectacular backlit designs through rear-milled cut-outs.

In the kitchen the words 'quality' and 'detail' should be at the heart of any design

Apart from a number of solid colours – including several shades of white – the extensive colour range also includes many attractive stone textures, to meet the demand for natural colours and materials in kitchen design.

HIMACS Gravilla Snow GM01

Sleek surfaces without visible joints make working in the kitchen a veritable pleasure.

Photographed by Atvanguard

Flushmounted sinks and basins, milled draining grooves, three-dimensionally moulded elements: the range of options for creating design features with HIMACS is almost limitless.

Everything leads to the use of HIMACS in the bathroom

HIMACS is safe and durable

- HIMACS is entirely free of silica, formaldehyde, nanoparticles and VOCs, helping to ensure the highest standards of indoor air quality for a healthier bathroom environment.
- HIMACS is easily repairable and built to last. Minor scratches and everyday wear can be repaired, allowing your bathroom to retain its premium finish for years, making it a durable and sustainable investment.
- A selection of our most popular colours, together with all HIMACS sinks and basins, feature SCS-certified recycled content, making this premium surface a smart and responsible choice.

HIMACS is easy to use

- HIMACS is non-porous and 100% water-resistant.
- HIMACS is resistant to almost all common household chemicals.

HIMACS is very easy to clean

- HIMACS can be cleaned with a damp cloth and standard household detergent, removing almost all dirt without leaving any residue.
- HIMACS can be fabricated with inconspicuous seams, preventing the build-up of germs, bacteria and other pathogens.
- HIMACS offers a wide range of round, rectangular and oval washbasins that can be seamlessly integrated or installed as stylish countertop basins.

HIMACS looks amazing

- HIMACS has a natural matt satin finish with a soft, pleasant feel that can also be polished to a high-gloss finish on request.
- HIMACS offers a broad selection of attractive colours, from timeless whites and classic solid shades to contemporary trend colours, as well as numerous natural stone-inspired designs.
- HIMACS can be thermoformed into three-dimensional shapes, while also offering the option of creating spectacular backlit designs through rear-milled cut-outs.

HIMACS Intense Ultra Black S922U
HIMACS Intense Ultra Light Grey S925U

HIMACS transforms every bathroom into your very own personal oasis of comfort

The topmounted basins in the HIMACS collection combine maximum bowl size with elegant, sleek lines.

All the functional elegant, minimalist bathroom elements were individually designed with HIMACS: the washstand with its dramatic double sink, furniture fronts with bevelled handles, and the room-partition that supports the washstand whilst at the same time forming the shower cladding.

This stylish shower is completely manufactured from HIMACS, creating a hygienic, easy-care zone with maximum “feel-good” factor.

Beautiful Installations: solutions for the bath and shower made of HIMACS

Good architecture is the result of a harmonious relationship between form, colour and function. Function in particular is determined by the materials used. HIMACS in the bathroom offers an unbeatable combination: thanks to flush-mounted installation, extremely hygienic units can be created, looking as if cast from a single piece, while also being easy to clean and maintain.

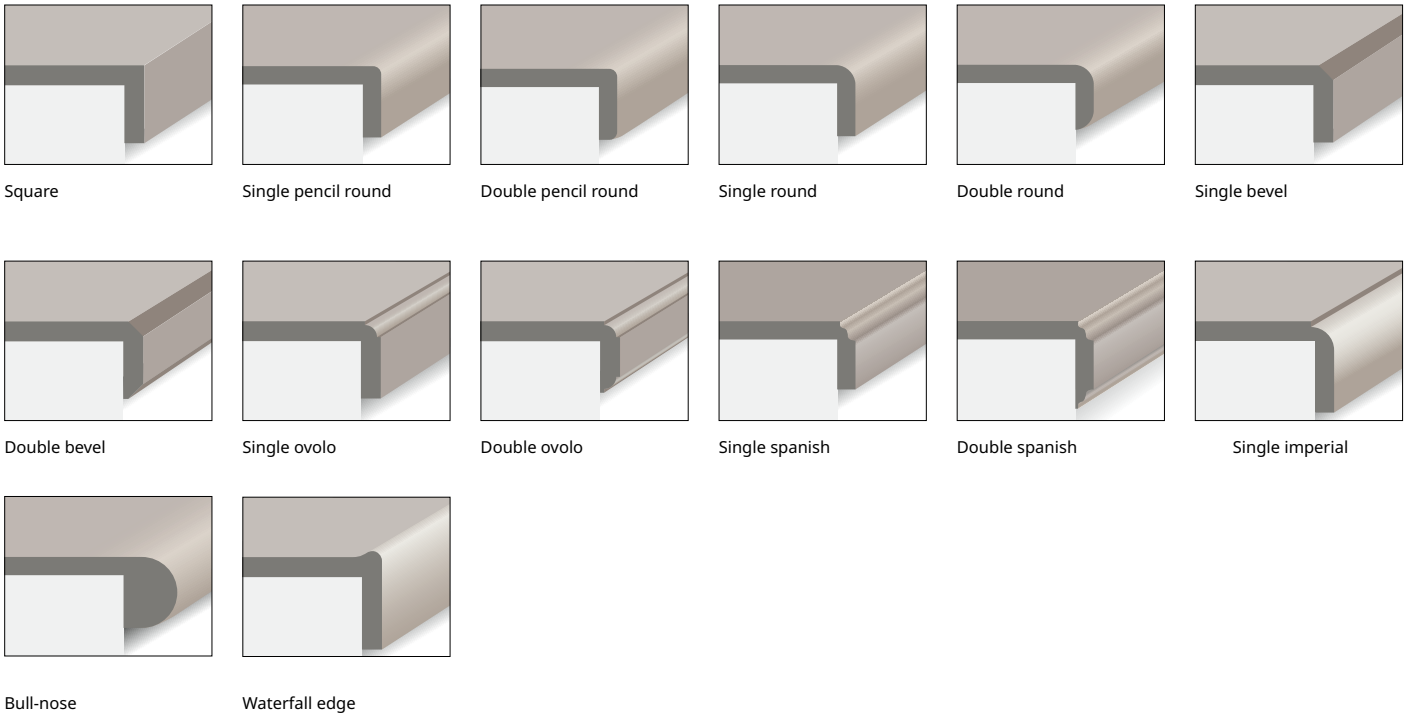

Warm and pleasing to the touch, this matt, silky elegance offers an ideal solution for the bathroom. The HIMACS product range for bathrooms includes a shower tray and a bath that can be integrated seamlessly, to ensure a serene, harmonious and relaxing environment.

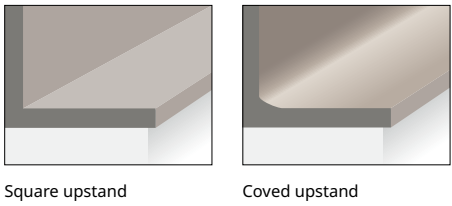

Straight, curved, rectangular, baroque ... any shape you can imagine

Due to the highly flexible manufacturing options of HIMACS your dealer can offer a wide range of attractive and functional edge-treatments and hygienic splashbacks for your kitchen. Here you can see a small selection of the various possibilities

Check out the full collection of shapes with 8% SCS certified recycled content at lxhausys.com/eu

SCS Certified Recycled Content for Sinks and Basins

No matter where you use them, in kitchens or bathrooms, HIMACS Shapes have always stood out for their elegance and performance. And to top that, now all HIMACS sinks and basins come with 8% pre-consumer recycled content, SCS certified.

So now, when you choose HIMACS for your residential, commercial or healthcare projects, it's another step towards more conscious and sustainable solutions.

HIMACS Basin RCB 502

Versatile sinks that add value

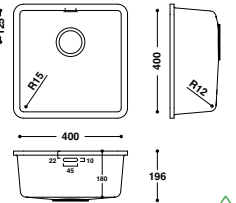

HIMACS Sinks for kitchen and healthcare applications

An extensive range of sizes and configurations, durability and optimum hygiene are all key qualities to consider when choosing a sink for the kitchen or healthcare facility. The high quality models in the HIMACS range cover all the bases. These coordinated sinks are installed as undermounted creating easy-care sink wet areas with nowhere for pathogens to lurk. Special custom-made creations are also an option.

- The HIMACS sinks RCS824D, RCS490D are only available with overflow.
- All other HIMACS sinks are available with and without overflow.

HIMACS M704 Aurora Stone Grey

HIMACS Basin RCB 5530

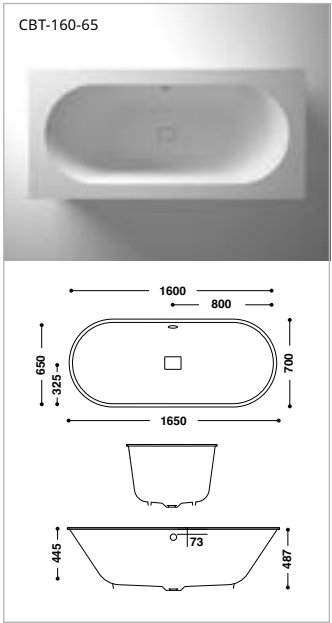

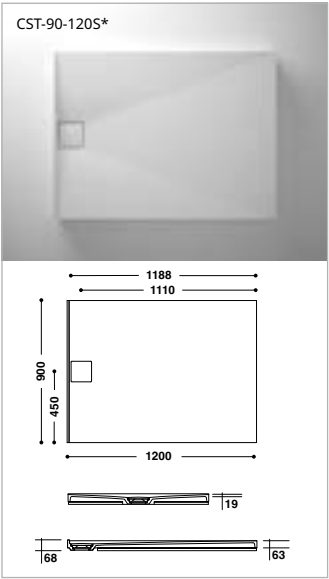

Solutions for the bath and shower, with all the benefits of HIMACS

HIMACS Shower Tray

This sleek, elegant model expands the possibilities for architects and designers to fit out the entire bathroom with HIMACS. The warm, soft-matt feel makes HIMACS a pleasure to touch.

* Side Drainhole

HIMACS Bath

In addition to the extensive and versatile shapes range, this bath model is ideal for forming the heart of any bathroom. The design is intended for seamless integration to a bespoke HIMACS surround of the designer's choice. The result is a smooth, continuous, hygienic surface that is especially easy to keep pristine and beautiful.

- Please note:**
1. The delivery includes either the bath or the shower tray (as shown in the sketch).
 2. The matching installation material consisting of height-adjustable feet, a sound insulating mat and a wooden stabilisation board will be an additional option and can be ordered separately as an accessory.
 3. Sheet material is also needed to create the installation seen in the photo.

All colours marked with the leaf icon  are SCS-certified to contain pre-consumer recycled content. The percentage of certified content may vary, please refer to our website for the most up-to-date information: www.lxhausys.com/eu

Colouring the kitchen and bathroom

Colour makes all the difference in design: from all the subtle variations of white, to deep, dramatic darks to powerful, vibrant hues.

Whatever shade you prefer – HIMACS offers the choice.

Gravilla

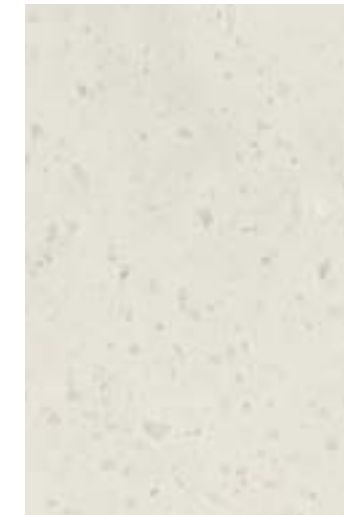

The colour of the physical product features natural veining patterns that may not be fully visible in this image. Explore full-size sheet visuals and detailed product information on our website.

Gravilla Snow
GM01 [12 mm]

Gravilla Cream
GM02 [12 mm]

Gravilla Millstone
GM03 [12 mm]

The Gravilla collection follows the aesthetic veined trend of Aurora and Marmo combined with inspiration from granite particles and is characterised by shorter veins and a chip effect. The new Gravilla colours have the benefit of being easier to fabricate with seamless joining, ideal for large surfaces such as shower or wall cladding in a bathroom, or long, wide islands in the kitchen, or high-impact monolithic reception desks.

 Contains SCS certified pre-consumer recycled content.

 As these are randomly veined colours, specific fabrication guidelines need to be followed. Ask your sales partner for more information or visit: lxhausys.com/eu.

Aurora and Marmo

Inspiring trends and ideas for your new bathroom:
In cooperation with the renowned Dutch interior designer Marike Andeweg, a brochure has been created that uses many examples to show how beautifully HIMACS can be used in modern bathroom design.

· HIMACS is extremely hard-wearing and durable and transforms your kitchen or bathroom into a universally functional room.

· Tests carried out in accordance to EN ISO 19712 for Solid Surface material, please see table (left) for results.

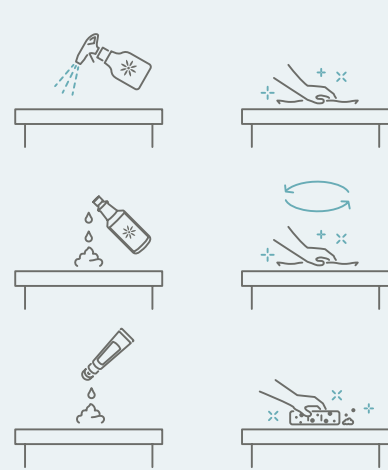

a = Acids and alkalis, in concentrations stronger than those shown in group 3, which can be contained in commercial cleaning agents, can cause surface damage or marking, even with very short contact times. Any spillage of such materials should be washed off immediately.

Evaluation

RATING LEVEL	DESCRIPTION
Rating 5	No visible change
Rating 4	Slight change in gloss and/or colour, only visible at certain viewing angles
Rating 3	Moderate change in gloss and/or colour
Rating 2	Marked change in gloss and/or colour
Rating 1	Surface distortion and/or blistering

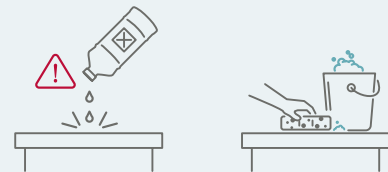

Care and Maintenance

HIMACS the Solid Surface Material by LX Hausys is hard-wearing, durable and extremely resistant to stains and is therefore very easy to look after. Below are a few simple tips and hints for caring for HIMACS to help maintain its exceptional quality for many years to come.

General day-to-day stains

HIMACS is a completely homogenous material. As it does not have any pores, you can simply and easily clean it with a damp cloth or sponge and a mild detergent. You can also use a domestic scouring agent on all matt finishes. It is useful to wipe your surface occasionally with a scouring agent or wet sponge to retain the even finish of your product.

Acidic cleaning agents

A number of cleaning agents contain acids, such as methyl chloride or acetone. You should avoid using these on a HIMACS surface. Should one of these products accidentally come into contact with the material, as a precautionary measure you should rinse the surface with soapy water to prevent any discolouring taking place.

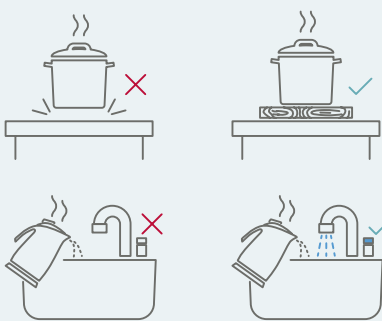

Burn marks

Small burn marks or marks caused by nicotine can simply be removed using a scouring agent or an abrasive sponge. Should this give the high-gloss finish a matt appearance, rubbing the surface with a scouring pad will quickly return it to its high-gloss state.

Tougher stains

Tougher stains, caused by food colouring, tea or fruit juice can easily be removed using a bleaching agent (do not leave in contact with the work surface for more than five minutes). Clean the surface with a domestic all-purpose cleaner and rinse with clean water. You can also use a scouring agent on matt finishes. Nail varnish can easily be removed with nail varnish remover (acetone-free) or a scouring agent.

Hot objects and boiling water

Hot saucepans or pots straight out of the oven or from the hob should not be laid directly on the HIMACS surface. Place a trivet or board underneath to prevent any damage to your product. If you pour boiling liquids into HIMACS sinks or basins, you should also pour in cold water at the same time. This also applies to the use of boiling water taps.

Sharp objects

HIMACS copes effortlessly with the wear and tear of everyday life, however pointed or sharp-edged objects can leave cuts or scratches on the HIMACS surface. You can repair smaller cuts and scratches without too much trouble but we recommend the services of a professional for especially deep cuts.
